NORTHERN Lite

*Personal Care
Quality Workmanship*

FIVE STAR RATING

The History of Northern Lite

In 1989, a group of experienced RV builders, working for a major fiberglass truck camper manufacturer saw a niche in the RV market and established Northern Lite Mfg. to design and build a fiberglass truck camper to fit import trucks.

The company evolved and eventually began to produce a complete line of full sized truck campers.

In 1989, two entrepreneurs, Mac Donkin and Lloyd Gartrell, who had sold their successful businesses and decided to retire, each purchased with their wives, a Northern Lite Camper for a once in a lifetime tour across Canada and the US and after that a tour to Alaska.

After spending 7 months on the road traveling, these gentlemen were so impressed with the quality and workmanship of their Northern Lite Campers that they decided that when they returned home they would invest in this growing company. They felt that if they and their wives were so impressed with these campers, then other buyers would be impressed also.

After 4 years of being investors, Mac and Lloyd decided to buy the rest of the Company.

Putting their business experience to work, and emphasizing the importance of building a quality product, Mac and Lloyd have expanded the Company until today Northern Lite is one of the leading manufacturers and exporters of molded fiberglass truck campers in North America.

Factory Tour

1

Northern Lite Campers are built using fiberglass molds in a process similar to building a fiberglass boat. After a layer of Gelcoat is applied to the interior of the mold, a mixture of "chopped" fiberglass strands and a plastic resin is sprayed on top of the Gelcoat to form a very rigid, strong and light weight molded shell.

2

Once both the top and bottom are pulled out of the molds, the top shell is placed over the bottom shell which has a plywood lip along its top.

3

The top is screwed onto the bottom shell through this plywood lip. Using a metal molding, a vinyl insert is then used to cover up stainless steel screws.

4

The camper then proceeds to the assembly line where openings for doors, windows, and exterior compartments are cut out and assembly begins.

The History of Northern Lite

(continued)

Mac Donkin continues to be actively involved in the everyday operation of this successful company.

The excellence of the Northern Lite Camper has been recognized by the RV Consumer Group who in their 2003 RV Rating Book awarded Northern Lite Campers their prestigious 5 Star Rating. This award was particularly gratifying because Northern Lite was the only truck camper manufacturer in North America to receive this honour.

In 2000, Northern Lite doubled the size of their manufacturing facility in Kelowna, B.C. and are now shipping their Truck Campers throughout Canada and into Alaska, Washington, Oregon, California and the other western states, and as far east as New Hampshire.

5

As the camper moves down the assembly line, cupboards, cabinets and appliances are installed and the exterior is completed.

6

At the Final Inspection station, final finishing is completed and quality and systems checks are carried out.

7

The "Rain Test," using a sprinkler system to check for possible leaks, is the final test before the camper leaves the assembly line.

8

Before it leaves the Northern Lite Factory, each camper is individually weighed and the actual weight is noted inside the camper.

The finished camper is now ready to ship to one of our over 30 Authorized Dealers throughout North America.

The Ten 2000 Series features a full 14" basement with heated and enclosed tanks. The Ten 2000 is 4" wider than our other Northern Series models and offers a 60x80 queen sized north/south bed.
