NORTHERN Lite

8'11" Q CLASSIC

FIVE STAR RATING

*Personal Care
Quality Workmanship*

The History of Northern Lite

In 1989, a group of experienced RV builders, working for a major fiberglass truck camper manufacturer saw a niche in the RV market and established Northern Lite Mfg. to design and build a fiberglass truck camper to fit import trucks.

The company evolved and eventually began to produce a complete line of full sized truck campers.

In 1989, two entrepreneurs, Mac Donkin and Lloyd Gartrell, who had sold their successful businesses and decided to retire, each purchased with their wives, a Northern Lite Camper for a once in a lifetime tour across Canada and the US and after that a tour to Alaska.

After spending 7 months on the road traveling, these gentlemen were so impressed with the quality and workmanship of their Northern Lite Campers that they decided that when they returned home they would invest in this growing company. They felt that if they and their wives were so pleased with these campers, then other buyers would be impressed also.

After 4 years of being investors, Mac and Lloyd decided to buy the rest of the Company.

Putting their business experience to work, and emphasizing the importance of building a quality product, Mac and Lloyd have expanded the Company until

today Northern Lite is one of the leading manufacturers and exporters of molded fiberglass truck campers in North America.

Mac Donkin continues to be actively involved in the everyday operation of this successful company.

The excellence of the Northern Lite Camper has been recognized by the RV Consumer Group who in their 2004 RV Rating Book awarded Northern Lite Campers their prestigious 5 Star Rating. This award was particularly gratifying because Northern Lite was the only truck camper manufacturer in North America to receive this honour.

In 2000, Northern Lite doubled the size of their manufacturing facility in Kelowna, B.C. and are now shipping their Truck Campers throughout Canada and into Alaska, Washington, Oregon, California and the other western states, and as far east as New Hampshire.

Northern Lite holds the distinction of producing the ONLY campers to achieve a

FIVE STAR RATING

**for six years running in the RV Rating Book as listed by the RV Consumer Group
P.O. Box 520, Quilcene, Washington, 98376
www.rv.org**

WHAT IS A 5-STAR RATING?

According to the RV Rating Book, "To get a 5-star rating, a brand needs to have an 'excellent' record of performance in Value, Reliability and Highway Control, indicated by ratings of 90 or higher."

One of the factors in the Value rating is depreciation. A high score in this indicates less depreciation on a product over the years.

Reliability is based on used RV appraisals and letters, claims, and commentaries from customers as well as owner satisfaction polls.

Highway Control rating is based on the balance and handling of the product.

Performance also includes the manufacturer's willingness to stand behind their product.

F A C T O R Y T O U R

Northern Lite Campers are built using fiberglass molds in a process similar to building a fiberglass boat.

STEP 1

After a layer of Gelcoat is applied to the interior of the mold, a mixture of "chopped" fiberglass strands and a plastic resin is sprayed on top of the Gelcoat to form a very rigid, strong and light weight molded shell.

STEP 2

Once both the top and bottom are pulled out of the molds, the top shell is placed over the bottom shell which has a plywood lip along its top.

STEP 3

The top is screwed onto the bottom shell through this plywood lip. Using a metal molding, a vinyl insert is then used to cover up stainless steel screws.

STEP 4

The camper then proceeds to the assembly line where openings for doors, windows, and exterior compartments are cut out and assembly begins.

STEP 5

As the camper moves down the assembly line, cupboards, cabinets and appliances are installed and the exterior is completed.

STEP 6

At the Final Inspection station, final finishing is completed and quality and systems checks are carried out.

STEP 7

The "Rain Test," that uses a sprinkler system, is the final test before the camper leaves the assembly line.

STEP 8

Before it leaves the Northern Lite Factory, each camper is individually weighed and the actual weight is noted inside the camper.

STEP 9

The finished camper is now ready to ship to one of our over 30 Authorized Dealers throughout North America.

SPECIAL CONSTRUCTION FEATURES

1 The top shell of the Northern Lite Camper is placed over the bottom shell and overlaps 2" to eliminate any possible chance of leakage.

2 Non rusting stainless steel screws are used to attach the top to the bottom and are also used on the exterior of our campers

3 A unique aerodynamic roof line gives extra strength to the roof and lessens wind resistance.

4 Steel jack brackets curve under the camper for extra support when lifting the camper. The brackets are screwed into 1" plywood backing.

5 Tie downs are welded to a 4"x6" piece of steel and mounted on 1" plywood for extra strength.

6 Cabinets are framed with strips of 3/4" plywood rather than spruce or pine, to get away from warped wood with knots, adding extra strength to cabinets.

7 Drawers are constructed using high quality Russian Birch and all drawer guides are metal.

8 No particle board or chip board anywhere!

9 All wood paneling is "real" oak veneer, not a paper or vinyl overlay.

- Rear bumper c/w step
- Outside bar-be-que c/w stand
- Electric jacks
- Removable carpet
- Pre-wire for solar panel
- 3-Way switch for bunk lights
- Stereo CD/DVD player
- LCD television c/w antenna
- Dometic lighted skylight/escape hatch
- Dometic microwave (in cupboard)
- Privacy drape
- Bedspread, pillow and shams
- Roof air conditioner
- Promo package

Special Edition
2005

Ten 2000CD 10'2" Northern Series Basement
With face to face dinette Fits full size long box trucks

Dometic Acrylic Thermal Pane Windows are 50% lighter than conventional Thermal Pane Windows.

Battery disconnect switch.

Stereo CD/DVD Player.

Interior of 10'2" Special Edition showing Dometic Lighted Skylight in bunk area and Dometic Acrylic Thermal pane Window in kitchen area.

8'11" QUEEN CLASSIC SPECIAL EDITION – NEW FOR 2005

The new 8'11" Northern Lite Camper (for short box trucks) is one of the lightest 8'11" campers in the market. We've lightened this camper by using Dometic Acrylic Thermal Pane windows (half the weight of conventional Thermal Pane windows), a new flooring system using Nidacore, aluminum jack brackets, a Full Queen sized foam mattress and by seeking out as many weight saving measures as we could find without affecting the structural integrity of the camper. The result is a base weight of 2050 lbs and a weight when nicely equipped of approximately 2240lbs.

8'11" Q Classic Series

With face to face dinette Fits full size short box trucks

Camper jack brackets are made of Aluminum rather than steel – another weight saving feature.

Dometic Acrylic Thermal Pane Windows

A pullout storage tray is standard equipment in our new 8'11" Camper

Nidacore is plastic honey comb sandwiched between two sheets of luan plywood resulting in a much lighter floor compared to using standard plywood.

STANDARD EQUIPMENT

- Two piece molded fiberglass
- 1" R6 block foam insulated walls, floor, roof
- 6.3 cu ft 3 way fridge – 2 door
- 18,000 BTU auto light furnace
- Power range hood
- 3 Burner stove top
- 2x20lb Propane cylinders
- 45 Amp converter c/w battery charger
- 6 Gallon hot water tank
- Bathroom c/w shower
- Fresh water toilet c/w holding tank
- Oak doors and trim packages
- Oak veneer paneling
- Marine headliner
- Screen door
- Quartz clock
- 26"x26" escape hatch
- 30 Amp power cord
- Mechanical jacks – white
- Pre-wire for electric jacks
- Folding assist handle
- Face to face dinette
- Full Queen (60"W x 80"L x 6"D) high density foam mattress
- 10" Basement storage c/w 7'2" storage tray
- Heated and insulated tanks
- Extra large, stainless steel sink
- Tinted, acrylic thermal pane windows c/w screens and blinds (Dometic brand)
- Extra large (dual) battery box
- Ultra light Nidacore flooring
- Medicine cabinet in bathroom

OPTIONAL EQUIPMENT

- Air conditioner
- Awning
- Bathroom vent – 12V *
- Boat rack and ladder
- Bedspread, pillows and shams
- Cable ready *
- Dually swing out brackets
- Electric jacks
